ebenezerkoomson430@gmail.com | +233 536 280 867

PROFESSIONAL SUMMARY

Computer Science graduate with practical experience in software development, web technologies, mobile application development, and IT support. Proficient in HTML5, CSS3, JavaScript, PHP, Python, and Flutter, with hands-on experience developing web applications and mobile interfaces. Developed a Web Application Vulnerability Scanner as a final-year project and a Flutter-based mock DJI controller interface as a practical development project. Strong problem-solving, debugging, and technical support skills, with the ability to learn new technologies and work effectively independently or within a team.

TECHNICAL SKILLS

- Programming: HTML5, CSS3, JavaScript, PHP, Python
- Mobile Development: Flutter
- Web Development: Front-end development, responsive web interfaces, web application development
- Application Development: Mobile UI development, debugging and testing
- Security: Web application vulnerability assessment and vulnerability scanning
- Database: Database management
- IT & Systems: Hardware/software troubleshooting, system installation and configuration, network support
- Technical Support: Application support, business email setup and support, user support
- Adaptable to fast-paced technical environments; able to work independently and collaboratively; communicates technical information clearly; committed to continuous professional development.
- Hardware support

Experience

Tontrac Ghana (Affiliated with XCMG) —
IT Officer, National Service
IT Officer
01/2025 - 09/2026

- Delivered technical support to users across multiple yard locations via on-site and remote assistance, enhancing user experience and operational continuity.
- Diagnosed and resolved hardware, software, and connectivity issues, minimizing operational disruptions and ensuring seamless workflow.
- Installed, configured, maintained, and troubleshooted computers, peripherals, and software applications.
- Configured and managed business email accounts, facilitating user access and streamlining communication processes.
- Supported software development activities involving web and mobile applications.
- Prioritized technical requests and resolved incidents promptly, escalating complex issues when necessary.

Soko Aerial Robotics — Intern
Intern
08/2024 - 09/2024

- Supported flutter mobile app development through user interface work and core flutter application concepts.
- Built basic skills in drone piloting and drone operations.
- Applied programming knowledge to software interface projects and drone-related systems.
- Gained exposure to connecting software development with emerging drone technology.

- Drove flutter mobile application development work, including user interface design and application concept implementation.
- Built foundational capability in drone piloting and operational procedures to support technology projects.
- Applied programming expertise to software interface solutions and drone-related system development.
- Integrated software development concepts with emerging drone technology through project-based exposure.
- Delivered flutter mobile app development support through user interface creation and flutter application concept work.
- Established foundational drone piloting and operations skills through practical training.
- Produced software interface and drone system project work using programming knowledge.
- Expanded experience in combining software development practices with emerging drone technology.

EDUCATION

Ghana Communication Technology University (GCTU) | Accra
BSc in Computer Science
09/2025

Personal Information

Title: SOFTWARE DEVELOPMENT | COMPUTER SCIENCE | IT SUPPORT

Certifications

JavaScript — Codecademy

PROJECTS

- Web Application Vulnerability Scanner — Final Year Project
- Designed and developed a web-based vulnerability scanning application for identifying potential security vulnerabilities in web applications.
- Applied web development and cybersecurity concepts to support automated vulnerability assessment.
- Worked on the application interface, functionality, testing, and debugging.
- Mock DJI Controller Interface — Flutter
- Developed a Flutter-based mock DJI controller interface demonstrating mobile UI development and interactive application design.
- Built a controller-style interface focused on recreating the layout and interaction experience of a DJI remote controller.
- Applied Flutter development concepts to structure and develop the mobile interface.
